Safety Data Sheet

Conforms to OSHA CFR 29 1910.1200 and aligns to the United Nations Globally Harmonized System
Conforms to The United Nations Regulation Globally Harmonized System
Conforms to Regulation (EC) No 1272/2008 and aligns to the United Nations Globally Harmonized System
Conforms to the Australian Preparation of Safety Data Sheets for Hazardous Chemicals under section 274 of
the Work Health and Safety Act

Section 1 - Chemical Product and Company Identification

Product Name: **VP-N6**
VP Racing Fuels, Inc., 7124 Richter Road, Elmendorf, TX 78112, 210.635.7744
Recommended Use: Racing Fuel

**RESTRICTIONS on USE**

**THIS FUEL IS FOR RACING VEHICLE USE ONLY!**

**NOT LEGAL FOR**

STREET DRIVEN MOTOR VEHICLE

Emergency Response Number: CHEMTREC 800-424-9300
International Emergency Telephone Number: 703-527-3887

Section 2 - Hazards Identification

**GHS HAZARD**

- Health Hazard
- Irritant
- Aquatic Hazard

**Hazard Statements**

**PHYSICAL HAZARDS:**
- H225: Highly flammable liquid and vapor

**HEALTH HAZARDS:**
- H304: May be fatal if swallowed and enter the airway
- H315: Causes skin irritation
- H319: Causes serious eye irritation
- H332: Harmful if inhaled
- H361: Suspected of damaging fertility or the unborn child
- H336: May cause drowsiness or dizziness
- H370: Causes damage to organs

**ENVIRONMENTAL HAZARDS:**
- H411: Toxic to aquatic life with long lasting effects

**PRECAUTIONARY STATEMENTS:**
- P102: Keep out of reach of children
- P202: Do not handle until all safety precautions have been read and understood
- P210: Keep away from sparks and open flames- No smoking
- P260: Do not breathe vapors
- P280: Wear protective gloves, clothing and eye protection

**RESPONSE STATEMENTS:**
- P301 +310+ P331: IF SWALLOWED: USA Immediately call the National POISON CENTER at 800-222-1222, OUT SIDE USA Immediately call poison center or doctor.DO NOT induce vomiting
- P303+P361+353: IF ON SKIN Take off immediately all contaminated clothing. Rinse skin with water
- P304+340: IF INHALED, Remove to fresh air and keep comfortable for breathing
- P305+P351: IF IN EYES rinse cautiously with water for at least 15 minutes
- P306+P361: IF ON CLOTHING, Take off contaminated clothing
- P370: In case of fire use foam, carbon dioxide, dry chemical to extinguish fire
- P376: Stop leaks if safe to do so. See section 6 for proper clean up

Trade Secret Provision and Chemical Concentration Disclosure: In accordance with OSHA and GHS Regulations we have withheld specific chemical identities. The chemical concentrations have been disclosed as a range and are applicable to the hazards as identified in this Safety Data Sheet.

Section 4 - First Aid Measures

**Eye:** Contact with the eyes can cause serious irritation. Symptoms may include discomfort or pain and redness. Severe overexposure can result in swelling of the conjunctiva along with tissue damage.

**Eyes:** Flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical aid.

**Skin:** Prolonged and repeated liquid contact can cause defatting and drying of the skin and can lead to irritation and/or dermatitis.

**Skin:** Flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical aid immediately. Wash clothing before reuse.

**Ingestion:** Liquid ingestion can cause inebriation, headache, gastrointestinal pain, nausea, and vomiting leading to central nervous system depression. Aspiration of liquid into the lungs must be avoided as even small quantities in the lungs can produce chemical pneumonia, pulmonary edema and even death.

**Ingestion:** Do NOT induce vomiting. Get medical aid immediately.

**Inhalation:** Prolonged breathing of high vapor concentrations can produce headache, dizziness, nausea, and impaired vision. Excessive overexposure can cause central nervous system depression, loss of consciousness, liver damage and death resulting from respiratory failure.

**Inhalation:** Remove from exposure to fresh air immediately. If not breathing, give artificial respiration. If breathing is difficult and IF TRAINED, give oxygen. Get medical aid. Do NOT use mouth-to-mouth resuscitation without protection.

*After first aid, get appropriate paramedic, or community medical support.* The severity of outcome following ingestion may be more related to the time between ingestion and treatment, rather than the amount ingested. Therefore, there is a need for rapid treatment of any ingestion exposure.
VP-N6
Conforms to OSHA CFR 29 1910.1200 and aligns to the United Nations Globally Harmonized System
Conforms to The United Nations Regulation Globally Harmonized System
Conforms to Regulation (EC) No 1272/2008 and aligns to the United Nations Globally Harmonized System
Conforms to the Australian Preparation of Safety Data Sheets for Hazardous Chemicals under section 274 of the Work Health and Safety Act

Note to Physicians: If you determine that a medical emergency exists and the specific chemical identity is necessary for emergency or first-aid treatment we will immediately disclose the specific chemical identity.

Call CHEMTREC 800-424-9300 or 703-527-3887. We will require a written statement of need and confidentiality agreement, in accordance with OSHA’s Trade Secret Regulations as soon as circumstances permit. In non-emergency situations, we will upon written request disclose a specific chemical identity.

Section 5 - Fire-Fighting Measures

General Fire Hazards
Use water to cool containers exposed to fire

Hazardous Combustion Products
Avoid fumes of burning product.

Extinguishing Media
Carbon dioxide, dry chemical, foam

Fire Fighting Equipment/Instructions
Fire fighters should wear full-face, self-contained breathing apparatus and impervious protective clothing. Fire fighters should avoid inhaling any combustion products.

Section 6 - Accidental Release Measures

Spill /Leak Procedures: Ventilate area highly flammable. Spillages of liquid product will create a fire hazard and may form an explosive atmosphere. Keep all sources of ignition away from the spill.

Spills: Avoid direct contact with material. Stop leak if without risk. Move containers from spill area. Prevent entry into sewers or waterways. Contain and collect spillage with non-combustible, absorbent material such as sand, earth, vermiculite or diatomaceous earth and place in a container for disposal.

Section 7 - Handling and Storage

Handling Precautions: Wash hands and exposed skin thoroughly after handling. Remove contaminated clothing and wash before reuse. Use with adequate ventilation. Avoid ingestion and contact with eyes, skin or clothing. Keep container tightly closed. Avoid inhalation.

Storage Requirements: Store in a tightly closed container in a cool, dry and well-ventilated area.

Section 8 - Exposure Controls / Personal Protection

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

STEL = Short-term Exposure Limit.
ACGIH® = American Conference of Governmental Industrial Hygienists. TLV® = Threshold Limit Value.
OSHA = US Occupational Safety and Health Administration. PEL = Permissible Exposure Limits.

NOTE: TWA Means "TWA is the employee's average airborne exposure in any 8-hour work shift of a 40-hour work week which shall not be exceeded." Note: Component D 500 ppm ceiling concentration. Note: California PEL for Component D 10 ppm *Listed on the OSHA Z1 or Z2 Table
**Ventilation:** Provide general or local exhaust ventilation systems to maintain airborne concentrations below TLV/PELs. Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.

**Contaminated Equipment:** Separate contaminated work clothes from street clothes and launder before reuse. Remove this material from your shoes and clean personal protective equipment.

**Personal protective equipment**

**Respiratory protection**
Where risk assessment shows air-purifying respirators are appropriate use a full-face respirator with multi-purpose combination (US) or type AXBEK (EN 14387) respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

**Hand protection**
Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique to avoid skin contact with this product. Dispose of contaminated gloves after use. Select gloves tested to the ANSI/ISEA 105-2011 or European EN374 Standard.

- Full contact: Nitrile rubber
- Splash contact: Nitrile rubber

This recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use. It should not be construed as offering an approval for any specific use scenario.

**Eye protection**
Face shield and safety glasses. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).

**Skin and body protection**
Impervious clothing, Flame retardant antistatic protective clothing. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

Conforms to OSHA CFR 29 1910.1200 and aligns to the United Nations Globally Harmonized System
Conforms to The United Nations Regulation Globally Harmonized System
Conforms to Regulation (EC) No 1272/2008 and aligns to the United Nations Globally Harmonized System
Conforms to the Australian Preparation of Safety Data Sheets for Hazardous Chemicals under section 274 of the Work Health and Safety Act

Section 10 - Stability and Reactivity

**Stability:** Stable under ordinary conditions of use and storage.

**Polymerization:** Hazardous polymerization has not been reported.

**Chemical Incompatibilities:** Strong oxidizing agents

**Hazardous Decomposition Products:** Combustion produces carbon monoxide and carbon dioxide

**Conditions to Avoid:** Avoid heat, sparks open flames and other ignition sources

The calculated Acute Toxicity Estimate Value (ATE) for this mixture:
ATE oral = 1818 mg/kg
ATE dermal = not listed
ATE inhalation (vapors) = not listed

**Route of Entry:** Inhalation, Ingestion, Absorption, Skin and/or Eye Contact

**Aspiration Hazard:** May be fatal if swallowed and enters airways

**Skin Corrosion/Irritation:** Causes skin irritation. Repeated exposure may cause skin dryness or cracking.

**Specific Eye Damage/Irritation:** Causes eye irritation.

**Specific Target Organ Toxicity (Single Exposure):** May cause drowsiness and dizziness.

**Specific Target Organ Toxicity (Repeated Exposure):** Contains material which may cause damage to the following organs: kidneys, lungs, liver, upper respiratory tract, skin, eyes, central nervous system (CNS).

**Signs and Symptoms:** Effects of overexposure can include irritation of the respiratory tract, nausea, vomiting, and signs of nervous system depression (e.g., headache, drowsiness, dizziness, loss of coordination, disorientation and fatigue). Continued exposure to high concentrations can result in vomiting, cardiac irregularities and sudden loss of consciousness.

Note: MTBE (methyl-tert-butyl ether) should be considered a "potential human carcinogen" due to an increase in leydig interstitial cell tumors of testes in male rats and an increase in lymphomas, leukemias, and uterine sarcomas in female rats. In another unpublished study MTBE was shown to be carcinogenic due to "increased incidence of a rare type of kidney tumor" in male rats and an "increase in the incidence of hepatocellular adenomas" in female mice.

**Toxicity:** Acute aquatic toxicity studies on samples of gasoline and naphtha streams show acute toxicity values greater than 1 mg/l and mostly in the range 1-100 mg/l. These tests were carried out on water accommodated fractions, in closed systems to prevent evaporative loss. Results are consistent with the predicted aquatic toxicity of these substances based on their hydrocarbon composition. These substances should be regarded as harmful to aquatic organisms, with the potential to cause long term adverse effects in the aquatic environment.

**Mobility:** Floats on water, absorbs to soil and has low mobility.

**Persistence/degradability:** Major constituents are expected to be readily biodegradable, but the product contains components that may persist in the environment.

**Bioaccumulation:** Contains components with the potential to bioaccumulate

**Other adverse effects:**
Release into the environment may lead to the contamination of environmental matrices (air, soil, subsoil, surface water and groundwater). Use in accordance with good working practices, avoiding release of the product into the environment.

### Section 13 - Disposal Considerations

**Disposal:** DO NOT REUSE EMPTY CONTAINER! Container should be completely emptied prior to discard. Container with residues should be considered to be hazardous wastes. Contact a licensed contractor for detailed recommendations. Follow applicable federal, state, and local regulations.
Section 14 - Transport Information

US Transport Information

ID No.: UN 1268
Shipping Name: Petroleum Distillates, n.o.s
Hazard Class: 3
Packing Group: II
Label: Flammable
Marking: Marine Pollutant when shipping ground greater than 119 gallons single container or any quantity by water
Placard: Flammable
Limited quantity
Inner packaging not over 1.0L (0.3 gallons) net capacity each.
Packaging instruction
Passenger aircraft
Quantity limitation: 5 L
Cargo aircraft
Quantity limitation: 60 L
Special provisions
144, IB2, T7, TP1, TP8, TP28

TDG Canadian Transport Information

ID No.: UN 1268
Shipping Name: Petroleum Distillates, n.o.s
Hazard Class: 3
Packing Group: II
Label: Flammable
Marking: MARINE POLLUTANT Not regulated if shipped by road or rail
Placard: Flammable
VP-N6

Conforms to OSHA CFR 29 1910.1200 and aligns to the United Nations Globally Harmonized System
Conforms to The United Nations Regulation Globally Harmonized System
Conforms to Regulation (EC) No 1272/2008 and aligns to the United Nations Globally Harmonized System
Conforms to the Australian Preparation of Safety Data Sheets for Hazardous Chemicals under section 274 of
the Work Health and Safety Act

IMDG Transport Information

ID No.: UN 1268
Shipping Name: PETROLEUM DISTILLATES, N.O.S
Hazard Class: 3
Packing Group: II
Flash Point: -11 C
EmS Number: F-E, S-E
Label: Flammable
Marking: Marine Pollutant Naphtha (petroleum), light alkylate, Mesitylene
Placard: Flammable

ADR/RID Transport Information

ID No.: UN 1268
Shipping Name: Petroleum Distillates, n.o.s
Hazard Class: 3
Packing Group: II
Label: Flammable
Marking: Marine Pollutant Naphtha (petroleum), light alkylate, Mesitylene
Placard: Flammable
Classification Code: F1

Australian Dangerous Goods Transport Information

ID No.: UN 1268
Shipping Name: Petroleum Distillates, n.o.s
Hazard Class: 3
Packing Group: II
Label: Flammable
Marking: Marine Pollutant Naphtha (petroleum), light alkylate, Mesitylene
Marking: MARINE POLLUTANT The marine pollutant mark is only applicable for packages containing more than 5
liter for liquids
Placard: Flammable
Section 15 - Regulatory Information

US Regulations
TSCA: Component A, Component B, Component C, Component D, Component E, Component F

CERCLA Hazardous Substances and corresponding RQs: Component D 1000 pounds, Component E 1000 pounds, Component F 5000 pounds

SARA Community Right-to-Know Program: Component D

Clean Water Act: Component D

Clean Air Act: Component F

OSHA: All ingredients are regulated by 1910.1200

State Regulations
California prop. 65: Component D Reproductive

Chemicals on the following State Right to Know Lists:

Massachusetts: Component A, Component B, Component C, Component D, Component E, Component F

New Jersey: Component A, Component B, Component C, Component D, Component E, Component F

Pennsylvania: Component A, Component B, Component C, Component D, Component E, Component F

Canadian Regulation:
WHMIS Classification: Component B
B2 - Flammable and combustible material - Flammable liquid

WHMIS Classification: Component D
B2 - Flammable and combustible material - Flammable liquid
D2A - Poisonous and infectious material - Other effects - Very toxic
D2B - Poisonous and infectious material - Other effects - Toxic

WHMIS Health Effects Criteria Met by this Chemical:
D2A - Teratogenicity and embryotoxicity - very toxic - other
D2B - Skin irritation - toxic – other
VP-N6
Conforms to OSHA CFR 29 1910.1200 and aligns to the United Nations Globally Harmonized System
Conforms to The United Nations Regulation Globally Harmonized System
Conforms to Regulation (EC) No 1272/2008 and aligns to the United Nations Globally Harmonized System
Conforms to the Australian Preparation of Safety Data Sheets for Hazardous Chemicals under section 274 of
the Work Health and Safety Act

WHMIS Classification: Component E
B2 - Flammable and combustible material - Flammable liquid
D2B - Poisonous and infectious material - Other effects - Toxic

WHMIS Health Effects Criteria Met by this Chemical:
D2B - Skin irritation - toxic - other

The following substances are specified on the public Portion of the Domestic Substances List (DSL):
Component A, Component B, Component C, Component D, Component E, Component F

Europe Regulations
Classification and labeling have been determined according to EU Directives 67/548/EEC and 1999/45/EC
(including amendments) and take into account the intended product use.

Europe inventory: Component A

EC Symbols
EC Classification: Very Toxic

EC Risk Phrases:
R45: May cause cancer.
R46: May cause heritable genetic damage.
R65: Harmful: may cause lung damage if swallowed.

EC Safety Phrases:
S53: Avoid exposure - obtain special instructions before use.
S45: In case of accident or if you feel unwell, seek medical advice immediately.

Europe inventory: Component B

EC Symbols
EC Classification: Toxic

EC Risk Phrases:
R45: May cause cancer
R46: May cause heritable generic damage
R65: Harmful may cause lung damage if swallowed
VP-N6
Conforms to OSHA CFR 29 1910.1200 and aligns to the United Nations Globally Harmonized System
Conforms to The United Nations Regulation Globally Harmonized System
Conforms to Regulation (EC) No 1272/2008 and aligns to the United Nations Globally Harmonized System
Conforms to the Australian Preparation of Safety Data Sheets for Hazardous Chemicals under section 274 of the Work Health and Safety Act

Europe inventory: Component D

![EC Symbols]

EC Classification: Highly flammable. Harmful

EC Risk Phrases:
R11 Highly flammable.
R38 Irritating to skin.
*R63 Possible risk of harm to the unborn child.
R65 Harmful: may cause lung damage if swallowed.
R67 Vapors may cause drowsiness and dizziness.

EC Safety Phrases:
S2 Keep out of the reach of children.
S23 Do not breathe fumes, vapor or spray.
S24 Avoid contact with skin.
S29 Do not empty into drains.
S36/37 Wear suitable protective clothing and gloves.
S51 Use only in well-ventilated areas.
S61 Avoid release to the environment. Refer to special instructions/Safety data sheets.
S62 If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label.

Europe inventory: Component E

![EC Symbols]

EC Symbols
EC Classification: Highly flammable. Danger

EC Risk Phrases:
R11: Highly flammable.
R38: Irritating to skin.

EC Safety Phrases:
S2: Keep out of the reach of children.
S9: Keep container in a well-ventilated place.
S16: Keep away from sources of ignition - No smoking.
S24: Avoid contact with skin.

Europe inventory: Component F
EC Symbols

EC Classification: Danger

EC Risk Phrases:
R10: Flammable.
R37/38: Irritating to respiratory system and skin.
R41: Risk of serious damage to eyes.
R67: Vapours may cause drowsiness and dizziness

EC Safety Phrases:
S2: Keep out of the reach of children
S7/9: Keep container tightly closed and in a well-ventilated place
S13: Keep away from food, drink and animal feeding stuffs
S26: In case of contact with eyes, rinse immediately with plenty of water and seek medical advice
S37/39: Wear suitable gloves and eye/face protection.
S46: If swallowed, seek medical advice immediately and show the label.

International Regulations:
Australian Inventory of Chemical Substance: Component A Component B, Component C, Component D, Component E, Component F

National Existing Chemical Inventory in Taiwan: Component A Component B, Component C, Component D, Component E, Component F

Philippine Inventory of Chemicals and Chemical Substances: Component A Component B, Component C, Component D, Component E, Component F

China Existing Chemical Inventory: Component A Component B, Component C, Component D, Component E, Component F
